Dear William

Re: **Cataclean – Recommendation**

Auto Support Ltd run approximately 80 recovery vehicles operating in the Midlands region. We initially used Cataclean in a small number of our diesel vehicles that were experiencing regular problems with the diesel particulate filter. These problems resulted in unscheduled “down time” and poor performance in terms of mpg. A Cataclean treatment on these vehicles every six weeks, at the mandatory vehicle check, reduced unscheduled “down time” and restored mpg. As a result of this trial Auto Support Ltd treat all of our 80 vehicle fleet with Cataclean every six weeks at the mandatory vehicle check.

Rogers Rescue Ltd run both car and commercial workshops. We recommend a Cataclean treatment to all our customers at servicing/pre-MOT check. Both businesses purchase Cataclean through our local motor factor, BMF in Kidderminster.

Auto Support Ltd and Rogers Rescue Ltd would recommend Cataclean to any fleet owner and/or workshop. Cataclean is great product and an essential service item for any vehicle.

Your sincerely

**Richard Dawson**
